

Processors

Feldmeier offers a wide range of stainless steel processing tanks. They can be constructed with a dome top, open top with

lift off covers, dome bottom or a cone bottom. Feldmeier equipment incorporates the same quality and economical design that its customers are accustomed to and expect. The dempled heat transfer surfaces can be constructed in 1, 2, 3 or 4 heating/cooling zones depending on size and application and can be provided with an A.S.M.E. code stamp. All processors are available with agitation suitable for your product.
